

MECHANICAL DEVICES

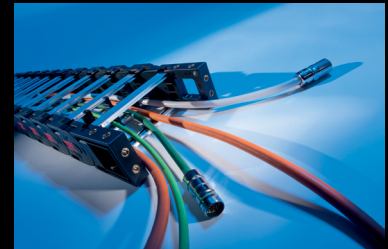

Mechanical Components: Complete Your Applications

iMotion represents world leading manufacturers that create all the necessary components to complete your motion control applications. Our devices provide the flexibility needed to perfect even the most intricate designs.

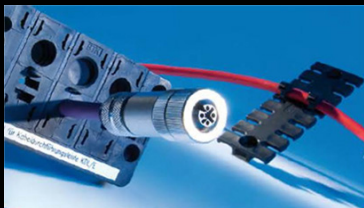

Pioneers in High-Tech Plastics for Cable Management
With its wide range of solutions, Murrplastik is the system provider for all your cable and control cabinet needs.

Product solutions include:

- Robotic Dress Packs
- Marking / Labeling Systems
- Cable Drag Chains
- Cable Entry
- Specialty Conduits and Fittings

Standard to Precision Screws
Rolling, turning or grinding to your custom specifications or to meet industry standards, our manufacturers create screws that can carry the load your application requires.

Types Available

- Acme
- Lead Screws
- Ballscrew
- Worm
- Trapezoidal
- V-Threads

The Future of Cabling

Combine power, signal, video, air and liquid in a crystal-clear flat cable. Cicoil's patented extrusion technology produces the most high performance flat cables available with the superior attributes you're looking for:

Features

- **Ultra Flexible:** Tens of millions of flex cycles in the tightest bend radius applications
- **Unlimited variation:** Micro size to 400mm wide cables, wires from 4 to 44 gauge, also including fiber optics, tubing, or coax, so you can get the exact cable you need
- **Extreme Environment:** Our cables perform from -65°C to +260°C, and under exposure to water, steam, chemicals, and oils.
